### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hayashi (JP Pat 2002193470A) discloses a recording device and voltage application method for electrostatic attraction of carrying belt. This art teaches applying a positive voltage for an electrostatic attraction structure. This art also teaches applying a negative voltage a predetermined time after applying a positive voltage. This art does not teach step change potential however, as it's voltage is applied in a sinusoidal application. The square waves shown in the top diagram of figure 6 do not apply to voltage.
